Sprint:	

Description

As a user I would need an option to include a message along with my gift if I am purchasing for a long-distance friend or family.

Comments

Comment by [Alexander Schoolcraft](#) [22/Mar/24]

As all of the purchases are handled by the vendor sites, they have built-in gift messaging options.

[SCRUM-17] Delivery Options Created: 19/Feb/24 Updated: 24/Mar/24 Resolved: 24/Mar/24	
Status:	Done
Project:	RegistryProject
Components:	None

Sprint:	

Description

As a user I need to be able to supply my address/shipping information for long-distant relatives or friends who are gifting me items.

Comments

Comment by [Alexander Schoolcraft](#) [22/Mar/24]

User accounts gather the addressing information - we could set up something to show the searched user's address when on the purchase screen

[SCRUM-16] [Privacy Options](#) Created: 19/Feb/24 Updated: 19/Feb/24

Description

I need to be able to add items to my existing lists.

Comment

Comment by [Alexander Schoolcraft](#) [22/Mar/24]

The system needs to be able to scrape data off of the website based off of the elements on the page, while verifying that the user is on an actual item page.

Description
It would be nice to be able to sort the registries by various factors, such as order of importance, price, etc.

Comments
Comment by Alexander Schoolcraft [22/Mar/24]
Currently, the lists are organized by Occasion and a user-supplied name. We could add in some code to include a date of the occasion, sum up the total price of the list, etc.

[SCRUM-9] user interface Created: 19/Feb/24 Updated: 08/Mar/24 Resolved: 08/Mar/24

Description
As a gift-giver, I need to be able to use my credit and debit cards with the system, to supply money for the various options, and the information should be stored securely, according to PCI DSS standards.

Comments
Comment by Alexander Schoolcraft [22/Mar/24]
With the current setup, all purchasing is handled through the vendor site, so no need to gather or store card information.
